We supply various types of UPS systems which are capable of providing emergency power to a load when the input power source or mains power fails in cases such as Power failure.

4

REMOTE ANALYTICS.

We offer remote analytics services such as instrumentation on web connected databases.

PROJECTS.

UPS & SERVER

An uninterruptible power supply or uninterruptible power source (UPS) is an electrical apparatus that provides emergency power to a load when the input power source or mains power fails. A UPS differs from an auxiliary or emergency power system or standby generator in that it will provide near-instantaneous protection from input power interruptions, by supplying energy stored in batteries, supercapacitors, or flywheels. The on-battery runtime of most uninterruptible power sources is relatively short (only a few minutes) but sufficient to start a standby power source or properly shut down the protected equipment.

Experience

ROUTING & SWITCHING

A prime driver of New Realms is the focus on continual improvement and every individual team member in the organisation is dedicated to the pursuit of quality. By continually reviewing and assessing our business at every level, we assure our customers that we are committed to providing them with customer service excellence and the highest quality products every time.

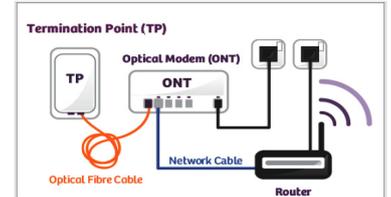

SERVICE OFFERING.

New Realms service offering is our ability to offer a purchasing solution that allows our customers to minimise costs in their business. The diverse requirements of Data & ICT Systems customers can sometimes make it difficult to source products and more importantly to source them at a competitive price. Having to follow up multiple suppliers, while ensuring delivery deadlines are achieved is a challenging task and ultimately requires a dedicated, professional team.

New Realms has the experience and supplier networks to achieve all of this, which allows our customers to minimise purchasing costs and focus on their core activities. The New Realms management team has built strong strategic alliances with suppliers that are capable of offering quality products, technical assistance, consistency in pricing and marketing support.
